PROFESSIONAL SUMMARY

Microsoft Dynamics 365 Business Central Technical Consultant specializing in production-grade AL development, translating functional specifications into robust technical solutions. Since joining Leaping Frog Solutions in 2025, has contributed to AL extension and reporting engagements across manufacturing, distribution, and pharmaceutical sectors, spanning custom extensions, RDLC/Word report development, approval workflows, and NAV-to-BC code migration. Skilled in technical design, code architecture, and production-ready implementation. Seeking Technical Consultant opportunities to lead complex BC implementations and drive measurable business value.

CORE COMPETENCIES

AL Programming & Extensions	Report Development	Data & Integration

Workflow & Automation	Implementation & Support	Development Tools & DevOps
Approval Workflows Job Queues Permission Sets & Security	UAT Support & Troubleshooting Go-Live Support Technical Documentation	Visual Studio Code Azure DevOps Git & GitHub GitHub Copilot

PROFESSIONAL EXPERIENCE

Leaping Frog Solutions Pvt. Ltd., Mumbai | Associate Technical Consultant | June 2025 – Present

AL Extension Development & Customization

- Designed and implemented AL extension solutions for enterprise clients spanning manufacturing, distribution, and pharmaceutical sectors; delivered table extensions, page extensions, CodeUnit logic, and enum objects per BC naming conventions and best practices.
- Built RDLC and Word layout reports customized for financial, operational, and management reporting; optimized query performance and designed intuitive layouts improving data clarity for end users.
- Architected 2-level and 3-level approval workflows across 3+ projects automating policy enforcement and stakeholder sign-off; leveraged events, subscribers, and business logic to streamline compliance-driven processes.
- Executed Configuration Package–based code migration on NAV-to-Business Central upgrade projects; validated field mappings, resolved data integrity issues, and documented migration runbooks for client handoff and go-live readiness.
- Performed UAT troubleshooting and go-live support; investigated production issues, implemented hotfixes, and coached client teams on technical features—reducing post-implementation escalations and enabling smooth adoption.

Gaotek Inc., Remote | Web Developer (Internship) | August 2024 – December 2024

- Built responsive web applications using HTML5, CSS3, JavaScript, and PHP with MySQL database backend; implemented client-side functionality and API integration supporting multi-client project delivery.
- Collaborated with UX/design and backend teams on feature implementation, code review, and quality assurance; delivered working code aligned with project timelines and technical specifications.

Scogo Technical, Mumbai | IT Support Executive / Technical Project Coordinator | September 2023 – June 2024

- Delivered technical support for enterprise IT environments; resolved network, infrastructure, and end-user issues ensuring system uptime and operational continuity.
- Coordinated IT infrastructure rollout projects; managed vendor communication, deployment timelines, and configuration verification supporting successful enterprise implementations.

INDEPENDENT PROJECTS (SELF-DIRECTED)

Self-initiated Business Central builds developed outside client assignments to deepen AL and ERP architecture expertise. Full case studies available at krishnaveni-mudaliyar.github.io.

Employee Asset Tracking Module – Business Central

(AL | CodeUnits | Pages | Table Extensions | RDL Reports | Job Queue)

- Architected end-to-end asset lifecycle management system in BC enabling asset allocation, utilization tracking, and maintenance scheduling across organizational locations.
- Developed AL-based custom tables and pages for asset master data, allocation workflows, and depreciation calculations; integrated approval workflow for asset requests.
- Built RDL reports for asset utilization analysis, maintenance tracking, and compliance reporting—enabling data-driven asset management decisions.

Customer Master Approval Module – Business Central

(AL | CodeUnits | Pages | Permission Sets)

- Built approval-status workflow for new customer master records with PAN uniqueness validation and conditional action/button logic based on approval state.
- Implemented automatic customer blocking on rejection or pending status to enforce data governance before records reach transactional use.

EDUCATION

Master of Computer Applications (MCA) Navinchandra Mehta Institute of Technology, Mumbai July 2026 CGPA: 8.16/10	Bachelor of Science in Information Technology (IT) CHM College, Mumbai June 2023 CGPA: 8.45/10
